Adding attachments to Interviews in Reschedge

Last Modified on 02/26/2019 10:38 am EST

Users in Reschedge can add attachments to the Interviews they schedule in the final review stage. By default, attachments are added to the calendar event, and are available for the Interviewers to view and download. Learn more about the Final review stage

There are some limitation to the attachments that can be added:

File types

Some file types are blocked, and cannot be added to Reschedge. Reschedge blocks file types that may contain viruses, such as executable files. If you are sure the file is safe, you can upload the file to a file sharing service, such as Google Drive or Dropbox, and add a link to the file in the Notes section.

Number of files and size

Users in Reschedge can add up to 10 attachments to each Interview. A single attachment size limit is 5 MB. This gives you more than enough space to upload your Candidate's resume, portfolio interview kit, or any series of files to the Interview.
